

Installation instruction Flasher Booster

No time for manuals? No problem, this will only take a few minutes of your time to read it and the installation of your new Flasher Booster is done fast and easy :-)

Color	Description
Violet (thin)	Left input from original flasher relay
Brown (thin)	Right input from original flasher relay
Violet (thick)	Output to left flashers
Brown	Output to right flashers
Red	Plus 12 Volt from ignition switch
Black	Ground

Note:

Just mount the module between the original flasher relay and the indicator switch, if there is only one output from the flasher relay. Just leave the other channel unconnected in this case.

Pls mount the module as far as possible from the spark plug cables. An installation with a short distance to the ignition might result in "funny" unwanted functions of the module

The Flasher Booster was developed to be used on show bikes and racing bikes. It should be installed by professional well trained mechanics only. Please check your local regulations regarding the traffic light rules in your country before of the use of the Module in your bike. Please be aware that we are not responsible for any hazards, damages or disadvantages due to the use of this device. The electronicbox devices are registered under the number DE54933725 WEEE as B2C device. We also declare that the Module is conform to the CE and ROHS regulations for the European market.

We tried to keep the functions of the Flasher Booster and this manual as simple as possible. However, please don't hesitate to contact us at info@elektronikbox.de if you have any questions during the installation.

We wish you to have a lot of fun with your new Flasher Booster in your bike and of course always Ride Safe!
